

THOMSON REUTERS®

## **Export Controls in India** Second Edition

**By Ameeta Verma Duggal and Aditi Warriar**

As the world recovers and continues with life and business in the aftermath of the disruption caused by the pandemic, the fragility of global trade and finance systems have become palpable. India has just found its momentum in the export control regulations arena with its memberships of the multilateral export control regimes coming in quick succession. This was succeeded by the introduction of licensing exemptions and relaxations. Compliance is the fulcrum of the changes being introduced by the regulatory authorities. The objective of *Export Controls in India* is to provide guidance on compliance with a comprehensive analysis of the applicable law and detailed procedures in India for the benefit of the users.
